SUMMARY

Game development student at Metropolia University of Applied Sciences currently working at Varjo in QA and hardware compatibility testing.
Hands-on experience in Unity and C#, focused on gameplay systems and real-time interaction. Co-founder of Jumatech Interactive Oy, building interactive training solutions using Unity.
Portfolio: https://juhosavi.github.io/

PROJECTS

Finnish Pipo Hockey – Unity, C# (Multiplayer)
Implemented lobby system, scoring logic and multiplayer gameplay features.
Cat Café Management – Unity, C# (Mobile)
Built order handling system and core interaction mechanics.
Chess Game & AI Bot – C++
Implemented full chess rules and AI using alpha-beta pruning with multithreading.
SpaceCat – Unity, C#
Developed player movement, enemy AI and scoring systems.
More projects at my portfolio.

WORK EXPERIENCE

Jumatech Interactive Oy – Co-founder & Developer *December 2025 – Present*

- Co-founded a 3-person game development team building interactive solutions for clients.
- Currently developing a hockey training simulator integrating projection and high-FPS camera tracking.
- Working as a Unity developer, implementing gameplay features and UI elements while contributing to overall system functionality.

Varjo – QA / Hardware & Compatibility Tester *September 2025 – Present*

- Testing XR systems across different PC environments and applications.
- Evaluating real-time performance, usability and overall user experience in immersive systems.

Varjo – Technical Support Intern *April - August 2025*

- Involved in refurbishing and hardware investigation of returned devices, including component replacement such as displays and other parts.

Game Programmer Intern – Tutors Finland *May - July 2022*

- Worked on the continuation of a football game project started by a previous team.
- Main focus was gameplay programming using Unity and C#, with a high level of independent work.

Earlier work experience (2011–2019): technical and operational roles.

EDUCATION

Bachelor of Engineering in ICT – Game Development *2024 – Present*
Metropolia University of Applied Sciences
Vocational Qualification in ICT – Game Programming *2021 – 2023*
Taitotalo

SKILLS

Programming	C# (Primary) Python, JavaScript, C++ (Basic)
Engines & Tools	Unity, Git, Unreal Engine (Basic)
Core Skills	Gameplay Systems, Real-time Interaction, QA Testing, Hardware Troubleshooting

CERTIFICATES

- Unity Junior Programmer – Unity (2024)
- Unity Essentials – Unity (2024)
